La riscoperta dell'*Endurance*

Nel 2022, cento anni dopo la morte di Sir Ernest Shackleton, il relitto della sua nave più leggendaria, l'*Endurance*, fu riscoperto sul fondale del Mare di Weddell al largo delle coste dell'Antartide. Varato per la prima volta nel 1912, l'ex yacht di lusso era stato ristrutturato per l'utilizzo negli ambienti più inospitali, proteggendo il suo equipaggio dagli elementi durante la spedizione imperiale trans-antartica di Shackleton nel 1914. L'audace missione della traversata dell'Antartide non fu portata a termine in quanto l'*Endurance* rimase bloccata nei ghiacci prima di poter raggiungere la sua destinazione. Il modo in cui il suo equipaggio sopravvisse alla disavventura, tuttavia, rimane ancora una delle storie più commoventi di resilienza umana, intraprendenza e spirito di squadra del secolo scorso. Mentre l'*Endurance* rimarrà per sempre nella sua "dimora" sottomarina, la riscoperta del relitto, straordinariamente ben preservato, riporta ancora una volta in superficie la sua incredibile storia. Divertitevi a costruire mentre celebriamo questa epica storia di sopravvivenza con uno splendido modello LEGO® Icons ricco di dettagli.

Il Trattato antartico

Il 1° dicembre 1959, dodici paesi firmarono il Trattato antartico per preservare il continente come centro indipendente per la ricerca scientifica. Secondo il trattato, senza nessun popolo indigeno in grado rivendicare la sovranità territoriale, nessun paese aveva l'autorità legale per rivendicare o tentare di recuperare l'Endurance.

Costruito per durare

/// La barca a tre alberi era dotata anche di un motore a vapore a tripla espansione per poter spingere la nave anche in caso di venti forti e ghiaccio.

*/// Grazie all'uso di una combinazione di legno di quercia, legno di pino e legno di *Chlorocardium rodiei* (un albero sempreverde) lo scafo era in grado di resistere anche alle condizioni più estreme.*

*/// Al momento della scoperta del relitto nel 2022, il nome *Endurance* in lettere dorate e la stella dorata erano ancora intatti.*

Tutti sopravvissuti

Il 5 dicembre 1914, Shackleton e il suo equipaggio salparono da Grytviken nella Georgia del Sud per una intrepida missione: raggiungere il Polo Sud in dodici mesi. Verso la fine di febbraio 1915, l'*Endurance* rimase inesorabilmente bloccata nella banchisa alla deriva nel Mare di Weddell. L'equipaggio stazionò a bordo fino al 27 ottobre 1915, nonostante il ghiaccio minacciasse di stritolare la nave. L'*Endurance* affondò il 21 novembre, distrutta dal ghiaccio.

I 28 uomini usarono le scialuppe di salvataggio per allestire il Patience Camp sulla banchisa dove rimasero fino all'aprile 1916, quando partirono su una scialuppa di salvataggio per l'Isola dell'Elefante. Ogni membro dell'equipaggio poté portare con sé solo un chilo di effetti personali, oltre a un banjo, che Shackleton pensava avrebbe svolto un ruolo fondamentale per la salute mentale dei suoi uomini! Dall'Isola dell'Elefante, Shackleton e alcuni dei suoi uomini completarono un'ultima tappa di due settimane per tornare in Georgia del Sud; tuttavia, approdarono sulla parte meridionale dell'isola – quella sbagliata – a causa di una forte tempesta e dovettero raggiungere a piedi la stazione baleniera di Stromness, una traversata che durò ben 36 ore. Qui, Shackleton organizzò i soccorsi, ma ci vollero quasi quattro mesi e mezzo e diversi tentativi per salvare i suoi ultimi uomini sull'Isola dell'Elefante.

La sopravvivenza dell'equipaggio dell'*Endurance* fu sicuramente dovuta alla straordinaria leadership di Sir Ernest Shackleton, senza dimenticare la sua eroica abnegazione e il suo ottimismo che tenne su il morale dei suoi uomini. Se qualcuno non aveva i guanti, Shackleton non esitava a prestare i suoi, se un uomo era stanco, veniva immediatamente mandato a riposarsi. Questi atteggiamenti altruisti, e la sua determinazione nel riportare tutti quanti a casa vivi, gli consentirono di conquistare la cieca fiducia del suo equipaggio.

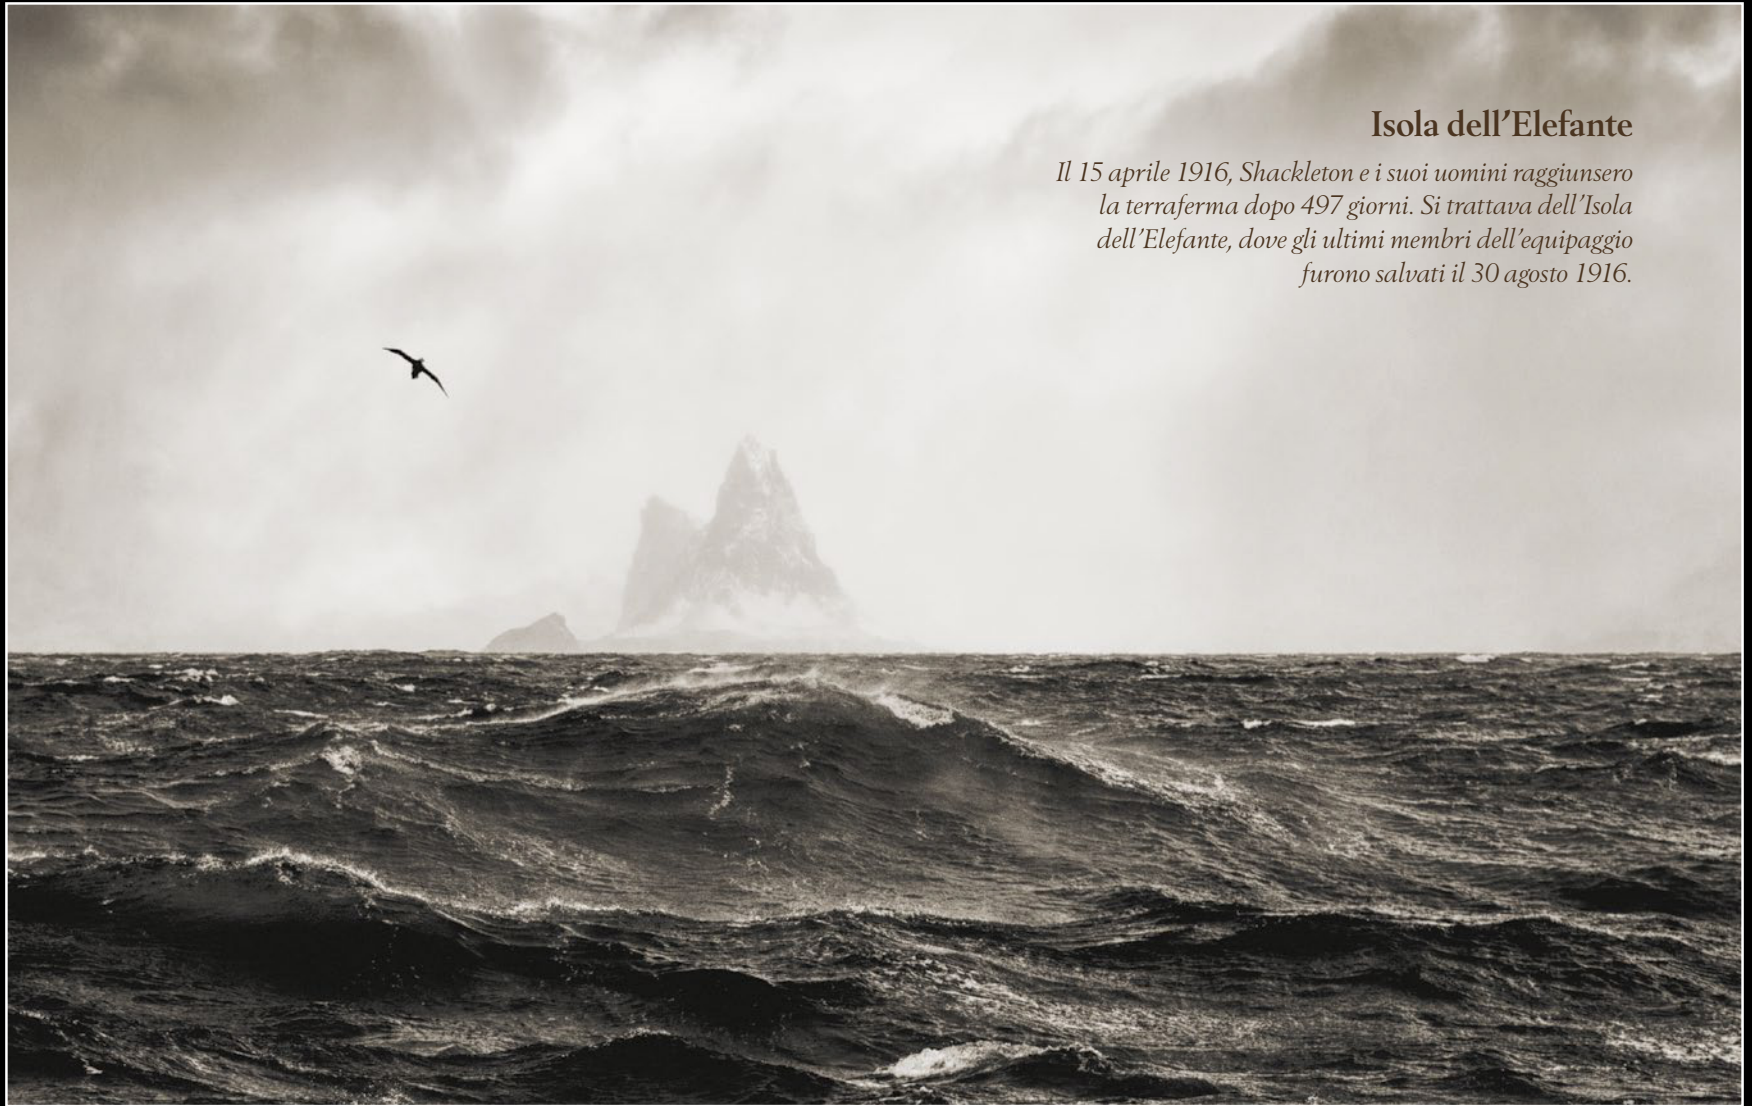

*“By Endurance
We Conquer.”*

– Il motto della
famiglia Shackleton

Isola dell'Elefante

Il 15 aprile 1916, Shackleton e i suoi uomini raggiunsero la terraferma dopo 497 giorni. Si trattava dell'Isola dell'Elefante, dove gli ultimi membri dell'equipaggio furono salvati il 30 agosto 1916.

Il viaggio

- 1 5 dicembre 1914 - L'*Endurance* parte da Grytviken, nella Georgia del Sud.
- 2 18 gennaio 1915 - Dopo aver navigato per settimane nel gelido Mare di Weddell, l'*Endurance* rimane intrappolata nella banchisa.
- 3 21 novembre 1915 - Lo scafo comincia a sgretolarsi sotto la pressione dei ghiacci e la nave affonda al largo della costa antartica dopo alcune settimane.
- 4 15 aprile 1916 - Due settimane dopo aver lasciato il Patience Camp su una delle scialuppe di salvataggio, l'equipaggio approda sull'Isola dell'Elefante.
- 5 21 maggio 1916 - Shackleton e i primi membri dell'equipaggio raggiungono la Georgia del Sud.
- 6 30 agosto 1916 - Gli ultimi membri dell'equipaggio vengono finalmente salvati dall'Isola dell'Elefante.

Il Design Team LEGO®

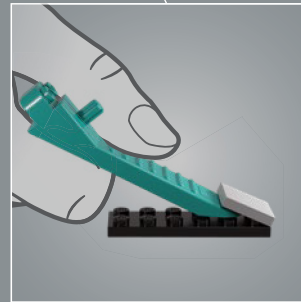

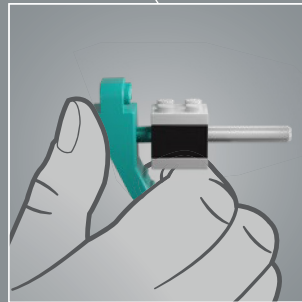

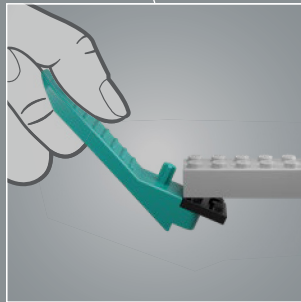

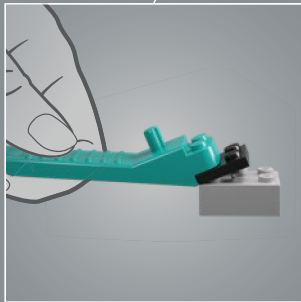

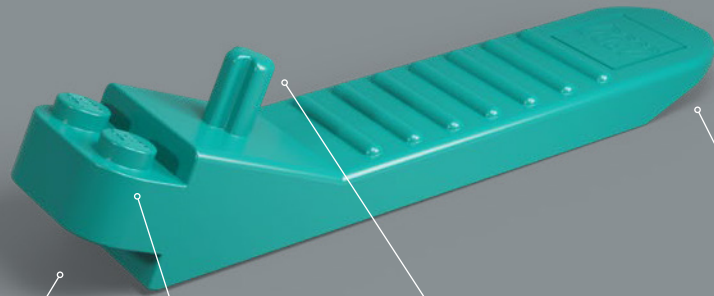

“Per determinare la scala del modello, abbiamo innanzitutto scelto un dettaglio significativo, le scialuppe di salvataggio (disponibili in due diverse dimensioni) e le abbiamo costruite nel modo più dettagliato possibile, mantenendo al minimo le dimensioni. Abbiamo quindi calcolato quali sarebbero state le dimensioni della nave. Sebbene nella vita reale l'Endurance aveva spazio per 28 uomini, l'abbiamo ridimensionata un po' per includere le cabine di Sir Ernest Shackleton e di uno scienziato della spedizione. L'interno rivela anche il motore a vapore della nave, che può essere smontato. Nell'imbarcazione vera, il motore a vapore era grande quanto una casa a due piani! I modelli da esposizione LEGO® Icons di solito presentano funzioni interessanti e volevamo che il timone potesse essere azionato tramite il timone di bordo. Per questa funzione abbiamo creato un minuscolo ingranaggio di trasmissione basato su una piastra angolare che ora è disponibile per la prima volta in marrone scuro. È una delle numerose modifiche cromatiche degli elementi che abbiamo apportato per conferire alla nave il suo aspetto autentico. Dopo tutto, l'Endurance è stata una delle navi in legno più robuste mai costruite e merita un tributo adeguato!”

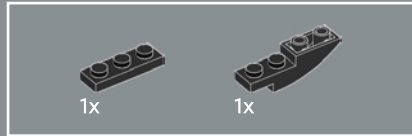

*Hans Burkhard Schlömer,
LEGO® Model Designer*

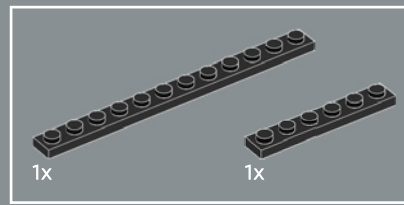

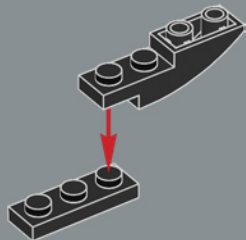

*“Dopo tutto,
l'Endurance è stata
una delle navi in
legno più robuste mai
costruite e merita un
tributo adeguato!”*

5

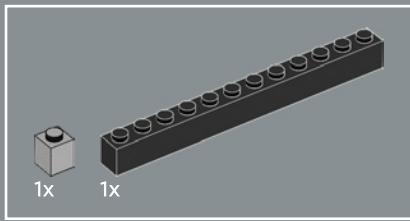

6

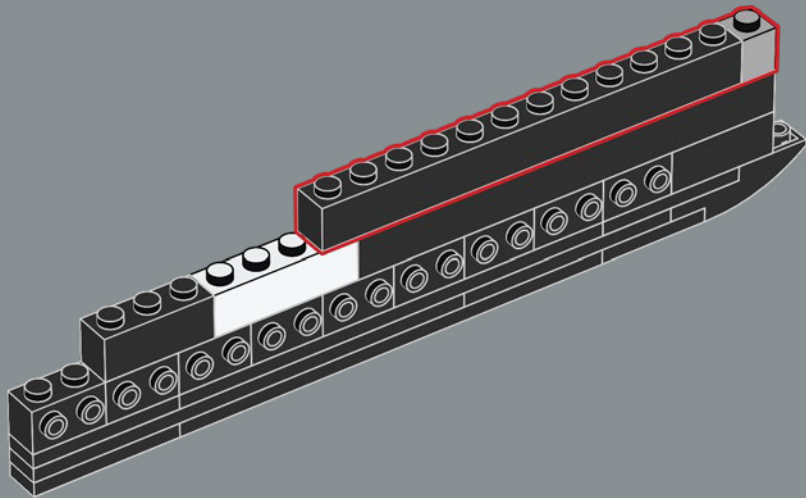

La chiglia è larga solo un mattoncino per preservare l'aspetto aerodinamico della nave, formando una parete nella sezione anteriore con mattoncini orientati lateralmente. Questa tecnica ha consentito di creare una forma attraente per lo scafo.

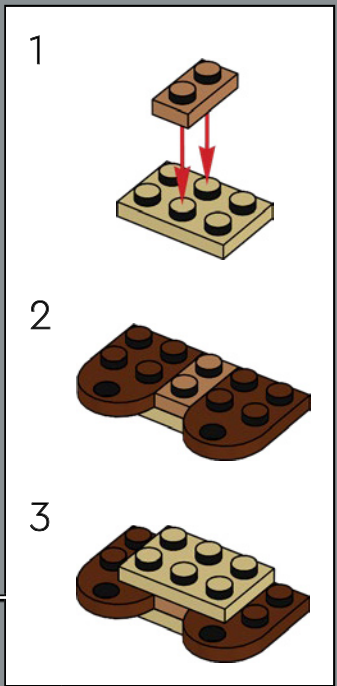

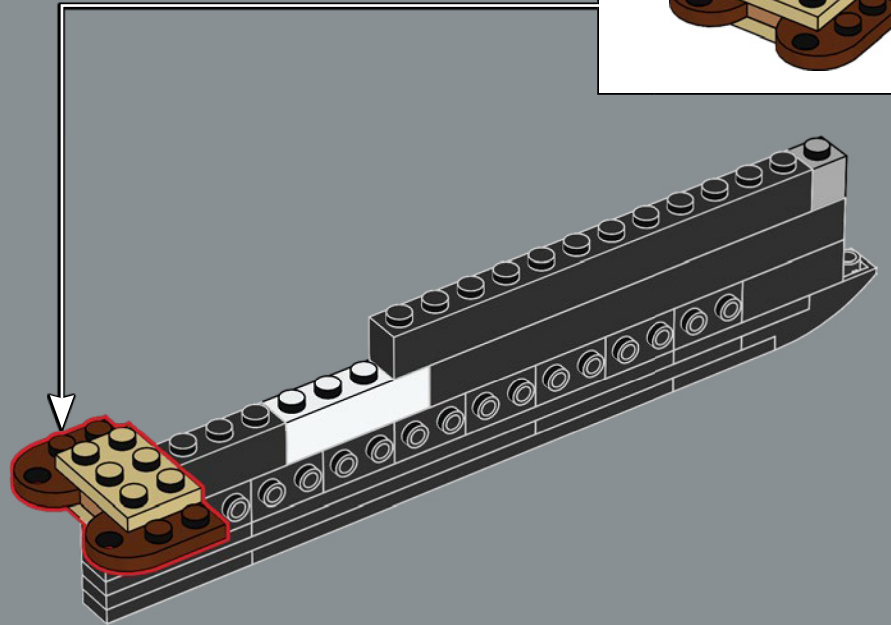

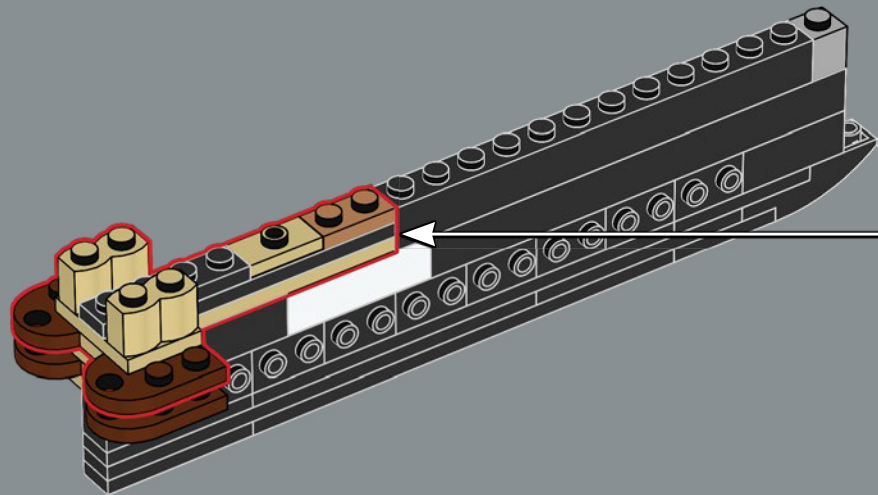

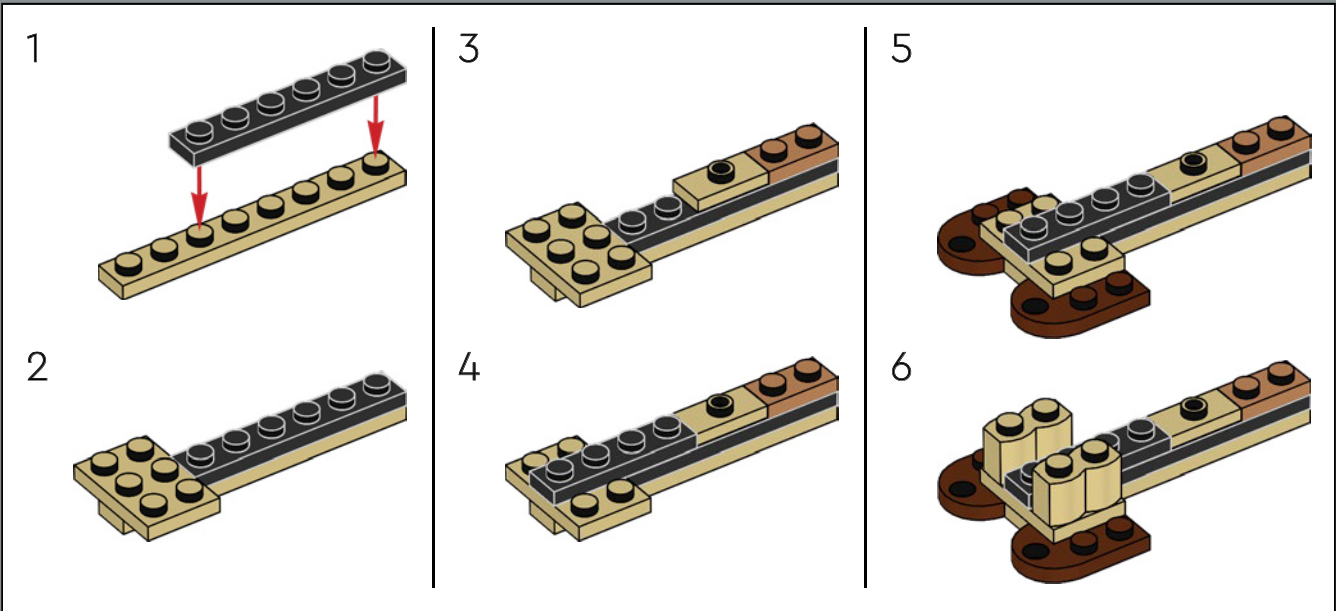

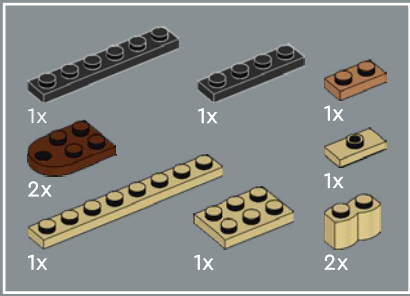

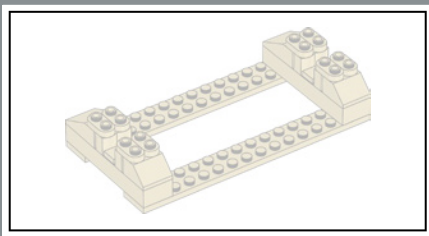

7

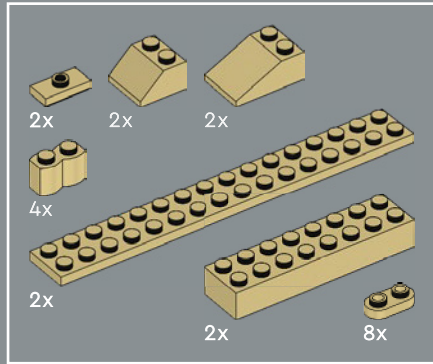

8

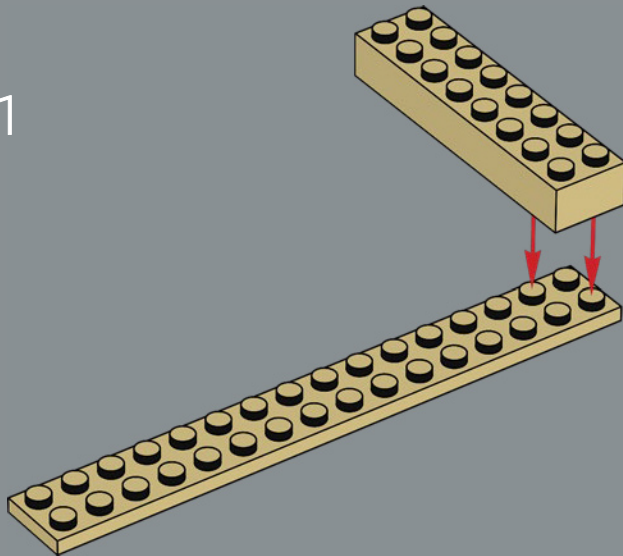

Poiché la chiglia è piuttosto stretta, è possibile utilizzare il supporto marrone per la costruzione per mantenere stabile il modello durante l'assemblaggio.

14

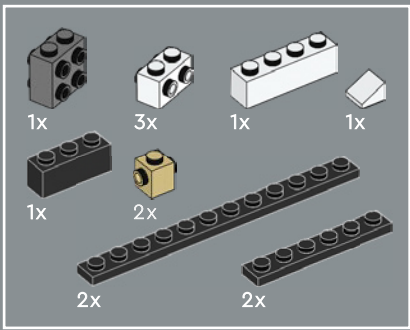

15

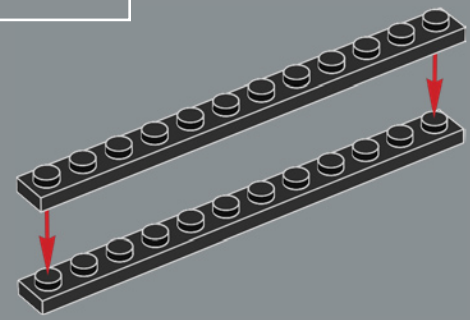

La parte anteriore dello scafo della nave era rivestita con lamiere per proteggere la chiglia di legno dal ghiaccio polare. Sul modello, questa sezione è stata ricreata con un mattoncino "slope" invertito 1x4x3 usato raramente.

L'*Endurance* si chiamava originariamente *Polaris*. Non è noto se Shackleton considerasse il nome della Stella Polare non idoneo per una spedizione al Polo Sud o se si sia ispirato al motto della sua famiglia, "By Endurance We Conquer". In ogni caso, la stella fu preservata!
